

REGISTRATION FORM – WEBINAR

New Delegated Regulation for cybersecurity under the Radio Equipment Directive (RED) and emerging European legislative landscape for cybersecurity

11/03/22 (9am-10am)

WEBINAR IN ENGLISH BY DR. BENOÎT STOCKBROECKX, TECHNICAL MANAGER, EURALARM

The RED lays down the rules for placing radio equipment on the EU market. It incorporates since its publication in 2014 some essential requirements awaiting enforcement by a delegated act. Such an act has been published in January this year. It enforces 3 essential requirements related to the cybersecurity of radio equipment. Products falling into the scope of these new requirements will need demonstration of conformity before affixing the CE mark and placing on the EU market.

The presentation will provide explanation on the scope of these requirements with examples from the alarm sectors (fire detection, security, social alarm), the timeline, the conformity assessment procedure and the related technical requirements currently discussed in the standardisation committees. The presentation will also sketch the whole picture of the emerging European legislative landscape regarding cybersecurity (Cybersecurity Act, RED, NIS2 directive and Cyber Resilience Act).

WHO ARE WE?

ANPI is a not-for-profit association that has emerged from the insurance and fire and theft prevention industries to promote existing good practice and to establish rules of conduct in the absence of official texts. ANPI is committed to ensure the reliability of products, installations and associated services through inspections, laboratory tests and certifications.

Confirm your participation by noon the day before the event:

- through our website <https://www.anpi.be/en/events>
- by e-mail to imc@anpi.be
